# Hong's Temple

Mr. Hong Won was a man who cherished his grandchildren above all else, and his time with them was his upmost source of joy in life. The tree they rested under together became a symbol of their love, and he decided to build a natural sitting area there where he could share laughter with his loved ones. This is where the idea and the inspiration for Hong's Temple was originated.

## Cairns in Your Mind

Throughout the History, travelers have collaborated in building Cairns to make the path and collectively navigate new territory. Today, stone cairns are often used to mark hiking trails or directional markers. They often point the way home, represent safety, hope and friendship. Stacking stones also can be a form of meditation. Our Cairns are stacked up high with Natural Beach Pebbles and River Rocks. Every single piece is hand-selected from remote Java Island to create calming and peaceful enviroment.

**LAVA STONE** Formed within the uninhabitable depths of a volcano, lava stones have unique, rough texture and are durable but lighter than natural stones making them great for our hand-carved statues.

Each piece is hand-carved from natural lava stone and is considered a **one-of-a-kind piece**, as no two lanterns are exactly alike. Install outdoor light fixtures or candles for illumination in your garden or along a walkway.

## About US

Style and fashion doesn't have to be achieved at the expense of our planet. Art is made to mimic the beauty found in nature and in the love we share with the people around us.

What could be more beautiful than helping to support our fellow humans, while creating art from the eco-friendly natural materials that Mother Earth has provided.

**Garden Age Supply** is a group of loving Earth-conscious artists who create beautifully hand-crafted furniture and accessories. We understand that there is no need to harm Mother Nature in order to create elegant works of art. She has provided all the materials needed when we open our minds and hearts to her embrace.

The **Garden Age** production site lies in beautiful West Java, Indonesia, where the local village residents use materials such as reclaimed wood, driftwood, lava and natural river stones, recycled glass, bamboo roots and a variety of other sustainable materials to create totally unique designs. These distinctly Indonesian materials are the defining essence of our collections, and carry the spirit of the local people.

The local women are able to use their talents toward craft and design to help support their families in a way that would otherwise not be possible. By using the naturally abundant materials in the area, our artists are able to save Indonesian rainforests so that they will continue to be a source of green materials in the future.
